Move from mass communications to modern conversations with all the tools district leaders need to strengthen the school-home connection

Alerts & Announcements >> Email unfortunately gets buried. With the communication app Bloomz, announcements remain visible for the time frame you specify. Alerts override notification preferences & quiet hours and can be urgently sent with pre-created templates.

PBIS Behavior Managment >> Bloomz has everything you need to track, analyze & reward students' behavior, both in the classroom or across the school. Enhance your school community with open communication and positive reinforcement!

Auto Attendance, Grade & Balance Notices >> Create & schedule student-specific notifications to be automatically sent on recurring intervals for attendance, lunch balances, grades, bus route updates, and more.

Attendance Management >> Save valuable office time with workflows that enable parent and/or staff responses to absence/tardy notifications with two-way dialogue for excusals.

Events & Appointments >> Eliminate the chaos for parents by centralizing calendar events and reminders while making participatory opportunities accessible for all.

Portfolios, Activities & Assignments >> Optional media-rich feature with cross-year time-lines & collaborative whiteboarding tools. Especially helpful for lower grade levels not yet accustomed to an LMS.

Dashboard Reports & Analytics >> Administrators at all levels glean valuable insights into the who, what, when & how for all aspects of their home-school communication. Easily identify the unreachable and take action to ensure contactability.

Language Translation >> Two-way AI powered translation in 108+ languages ensures info reaches all families on day #1 in their preferred language and modality (App, TEXT, Email, Voice). The original message is always available for viewing.

SIS, LMS, Data Integrations & SSO >> Access codes and manual invitation processes result in spotty utilization. Remove the friction for teachers, parents & students through any of our bulk import methods. SSO through Clever, Classlink, or GoogleClassroom makes access a breeze and automated data sync keeps the information up-to-date.
